(20A range not fused)Maximum input current: 20A, 15sec. Indication is possible at higher voltages but there is danger of damaging the internal circuitry. c) The maximum input current is 200mA or 20A depending upon the jack used excessive current with blow the fuse which must be replaced. Note: For seller fulfilled items from Books, Movies & TV Shows categories, the sellers need to be informed of the damage/ defect within 14 days of delivery. This is to prevent damage to the internal circuit. b) When the input is not connected, i.e. at open circuit, the gure "1" will be displayed for the overrange condition. NOTE: a) If the voltage range is not known beforehand set the FUNCTION switch to a high range and work down. The polarity at the RED test lead connection will be indicated at the same time as the current. Company Video 3 ½ DigitsManual RangingWITH HOLSTERCONTINUITY TESTDIODE TESTTr. (hFE) TEST DC Voltage AC voltage DC current AC current Resistance Download Catalogue 2This instrument is compact, battery operated, handheld 3 1/2 digit digital multi-meter for measuring DC and AC voltage. Set the FUNCTION switch to the "V" range to be used and connect the test leads across the source or load under measurement. Further, we ensure that all the products are stringently tested by our experts as per the quality parameters like strength, durability and dimensions. These items are not eligible for self-return. 1. The function switch should be set to the range which you want to test before operation. b) When only the gure "1" is displayed overrange is being indicated and the FUNCTION switch must be set to a higher range. Model Name/Number M92A Warranty 1 Year Digit Display 4 Digit Brand Mextech Usage/Application Industrial Dimension 160 x 82 x 30 mm Weight 250 g Low Battery Indication Yes Power Supply 9V Battery Specifications: FunctionRangeAccuracyDC Voltage200mV-1000V±(0.5%+1dgt)AC Voltage200mV-750V±(0.8%+3dgt)DC Current200µA-20A±(0.8%+1dgt)AC Current200mA-20A±(1.0%+3dgt)Resistance200Ω-20MΩ±(0.8%+1dgt) Interested in this product?Get Latest Price from the seller Contact Seller About the Company Year of Establishment2005 Legal Status of FirmIndividual - Proprietor Nature of BusinessAuthorized Wholesaler Number of EmployeesUpto 10 People Annual TurnoverRs. 10 - 25 Crore IndiaMART Member SinceMar 2011 GST07ACEPB2404P1ZT Backed by rich industry exposure, we are engaged in Distribution, Wholesale, Trading & Retailing of various types of Measuring Instruments such as Digital Multimeters, Digital Clamp Meters, Sound Level Meter, Digital Anemometer, Industrial Thermometers, Vibration Meters, Humidity Meters, Panel Meters, Grain Moisture Meters, Wood Moisture Meters, Soil Moisture Meters, Infrared Thermometers, Clamp On Power Meters, Insulation Testers, Earth Stone Bridge and Digital Lux Meters, etc. DC and AC current, resistance, diode and continuity test. The Dual-Slope A-D converter uses C-MOS technology for auto-zeroing. Connect the BLACK test lead to the COM jack and the RED test lead to the mA jack for a maximum of 200mA. For a maximum of 20A, move the red test lead to the 20A jack. If you do not receive a response from the seller for your return request within two business days, you can submit an A-to-Z Guarantee claim. This is normal for high resistance readings. The polarity of the RED lead connection will be indicated at the same time as the voltage. Connect the BLACK test lead to the COM jack and the RED test lead to the VΩ jack. Set the FUNCTION switch to the "V" range to be used and connect the test leads across the source or load under measurement. 1. 2. b) When only the gure "1" is displayed, over range is being indicated and the FUNCTION switch must be set to a higher range. c) Do not apply more than 1000V to the input, indication is possible at higher voltages but there is danger of damaging the internal circuitry d) Use extreme caution to avoid contact with high tension circuits when measuring high voltage. Range Accuracy Resolution200mV±0.5% of rdg ±1 digit100µV2V 1mV20V 10mV200V 100mV1000V ±0.8% of rdg ±2 digits 1VInput impedance: 10MΩ on all rangesOverload protection: 250V rms on 200mV range and 1000V DC or peak AC on all other ranges. NOTE: a) If the resistance value being measured exceed the maximum value of the range selected, an overrange indication will be displayed "1", select a higher range. For seller-fulfilled items from Fine Art category, the sellers need to be informed of the damage / defect within 10 days of delivery. (Note: The polarity of the RED test lead is "+"). The mark or sign next to the test lead jacks, is for warning that the input voltage or current should not exceed the indicated values. If you've received a seller-fulfilled product in a condition that is damaged, defective or different from its description on the product detail page on Amazon.in, returns are subject to the seller's approval of the return. The fuse rating should be 0.2A and no more to prevent damage to the internal circuitry. Range Accuracy Resolution2mA±1.2% of rdg ±3 digits1µA20mA 10µA200mA ±2% of rdg a ±3 digits 100µA20A ±3% of rdg ±7 digits 10mAOverload protection: F 0.2A/250V fuse. For Resistance of approximately 1MΩ and above. The fuse rating should be 200mA and no more to prevent damage to the internal circuit. The meter may take a few seconds to become stable. Set the FUNCTION switch to a high range and work down. • Single 24 position easy to use rotary switch • High sensitivity of 100µV • Automatic over range indication with the "1" or "-1" displayed • Automatic polarity indication on DC range • All ranges fully protected • Diode testing with 1mA xed current • Transistor hFE test (optional)Maximum LCD display: 1999 counts (31/2 digits) with automatic polarity indicationMeasuring Method: Dual-slope integration A-D converter systemOverrange Indication: "1" or "-1" gure only in the displayMaximum common mode voltage: 500V DC/AC rmsReading rate: 2~3 reading per sec. Set the FUNCTION switch to the "A" range to be used and connect the test lead in series with the load under measurement. Set the FUNCTION switch to the "A" range to be used and connect the test leads in series with the load under measurement. Excessive current will below the fuse which must be replaced. For a maximum of 20A move the red test lead to the 20A jack. Switch the meter on and check the 9V battery, if the battery is weak, a sign will appear on the display. 3. If this does not appear on the display, proceed as below, see MAINTENANCE if the battery has to be replaced. Our products are offered in adherence to specified quality standards keeping in mind the performance parameters and time limit promised to clients. For seller-fulfilled items from Sports collectibles and Entertainment collectibles categories, the sellers need to be informed of the damage / defect within 10 days of delivery. With a comprehensive knowledge of the industry, we are able to provide our clients this range to suit their tastes and needs. • Do not apply more than 750V rms to the input. • Use extreme caution to avoid contact with high tension circuits when measuring high voltage. Range Accuracy Resolution2V±0.8% of rdg ±3 digits1mV20V 10mV200V 100mV750V ±1.2% of rdg ±3 digits 1VInput impedance: 10MΩ on all rangesFrequency range: 40Hz to 400HzOverload protection: 750V rms or 1000V peak continuous on all ranges.Indication: Average (rms of sine wave) 1. The maximum terminal voltage drop is 200mV. Range Accuracy Resolution2mA±0.8% of rdg ±1 digit1µA20mA 10µA200mA ±1.2% of rdg ±1 digit 100µA20A ±2% of rdg ±5 digits 10mAOverload protection: F 0.2A/250V fuse. Learn more about returning seller fulfilled items. Set the FUNCTION switch to the Ω range to be used and connect the test leads across the resistance under measurement. These products are extensively used by our clients due to their accuracy and cost effectiveness. c) When checking in-circuit resistance, be sure the circuit under test has all power removed and that all capacitors are fully discharged.GB The return timelines for seller-fulfilled items sold on Amazon.in are equivalent to the return timelines mentioned above for items fulfilled by Amazon. Polarity selection and over-range indication full overload protection is provided. NOTE: • See DC Voltage measurement Note a), b). 2. NOTE: a) If the current range is not known beforehand. (20A range not fused.)Frequency range: 40Hz to 400Hz.Maximum input current: 20A, 15sec.Indication: Average (rms of sine wave) 1. The seller will arrange the return pick up for these items. It is specially designed with high stability for use on modern computerized circuits and laboratory, workshop, hobby and home applications. NOTE: The maximum input current is 200mA or 20A depending upon the jack used. We trade and supply these products after extensive research of the products demanded by clients. (approximate)Temperature for guaranteed accuracy: 23±5°C.Temperature Ranges: Operating 0°C to 40°C (32°F to 104°F); Storage -10°C to 50°C (14°F to 122°F)Power Supply: One 9V battery (NEDA 1604 or 6F22 type or equivalent).Low Battery Indication: to left of display.Size: 85(W) × 165(D) × 32(H)mm.Weight: 250g (including 9 Volt battery)Accessories: Operating manual, set of test leads.Accuracies are: ± (% reading + No. of digits).Guaranteed for 1 year: 23°C ±5°C, less than 75% R.H. 1. The 20A range is not protected by a fuse.
